

CAMP GRANITE IS ATTRACTING PROSPECTORS

Interest in New Strike Near
Lodi Tanks is Growing in
Intensity

Interest in the new strike at Granite, near Lodi tanks, has increased following publication of the assays received from samples of high grade and automobiles heavily loaded with men and camp equipment continue to pass through Lodi tanks, day and night. Some of the hard worked contingent have returned from an inspection of the discovery and concede that it is a wonderful showing. The optimism, a far representative of the class that believes in digging, are confident that another bonanza district has been found.

Nearly every man who has visited Granite has panned the ore and in every case got a string of colors that was convincing. One old time prospector who has met with some disappointments privileged to go underground said that the crosscut at a depth of 25 feet in the shaft where the rich ore was found had penetrated eight feet of ore, of which, few feet, he judged by pan-assays might go \$500 a ton. Tom Ayres and Fraction Jack Stewart of Mine told friends upon their return that there is a streak 18 inches in two feet wide which they judged by panning would run \$1000. A sample taken by Hughes and Hatterly, discovered across five feet, said in the known high grade streak assayed \$955 per ton, according to reports brought here from the mine. The bonanza streak is eight inches wide. Hughes and Hatterly are saving even the ore from the strike panning carefully, and they say they have sacked is sure to run \$1000 high, says Nevada Mining Press.

Visitors come in swarms and the strike is handicapped in their work by showing them around and permit ore for their education. Of course it is not possible to take ore down the hole and as the ore is exposed is worth many dollars per pound the owners are rather reticent to give away specimens.

W. H. Larchen, who with his brother is operating the Illinois, two miles from the strike, has located some claims nearby and has put men to work prospecting and prospecting. All visitors who are looking for ground have been told that claim owners have agreed that locations shall be confined to two claims for each outfit. It is said that arrangements will be made to let leases to desirable persons who know the bearing name and have sufficient money to finance the work.

One big advantage which has not been pointed out is that there is a custom mill at Phenolite, approximately 15 miles from Granite, where ore can be treated. The mill is owned by the Kansas City-Nevada Mining and Milling company and is under the management of W. H. Kinison. At present it is running on ore from the Ken Hills, but not to capacity. There is also an abundance of pinyon pine timber, suitable for stulls and ordinary mine timbering, collar sets, etc., available in the mountains back of Lodi tanks, accessible through Marble Falls canyon. The distance is about 10 miles. Water for domestic use, to be had at Lodi tanks, comes from Marble Falls through the pipeline owned by the Illinois mine.

CANDELARIA TO START MILLING PLANT SHORTLY

Delay Occasioned Through Non-
arrival of Certain Parts of
Electrical Machinery

Delay in delivery of electrical equipment from the east upset the plans of the Candelaria Mines Co. to start its new 300-ton cyanide mill in July. The material has been received and certain sections of the mill, which is practically completed, will be tried out the latter part of August. Power line construction is about finished and the contractors will have completed their work within a few days.

The 20-mile pipe line, which conveys water to the mine from springs on Mount Montgomery has been put in good condition. Four miles of new pipe has been laid at different points, to assure an unfailing supply and the reservoir and all tanks are full with a good flow coming in daily, says Nevada Mining Press.

The work of J. A. Burgess, who made a geological examination and survey of the Northern Belle and Holmes mines of the group, has been completed and as a result President C. D. Keating and Supr. C. A. Bennett have fixed on a number of places where development work will be done which should give a tonnage of high grade ore such as the old timers had when they were operating in many instances. This work will start on ore running from 20 to 40 ounces silver and everything indicates that the grade of ore sent to the mill will be much higher than the original estimates and that a better extraction will be made than has been calculated.

Preparations for stoping had been about completed when mill construction commenced and the mine will be ready to supply the ore when the plant starts. Ore passes the last of the work below the surface, are about completed and the transportation system has been installed. Ore from the Lucky Hill mine is hauled across the gulch and around the hill to a point of connection with the main underground transportation tunnel from the Northern Belle to the mill where it is dumped into an ore pass connecting with the tunnel. Ore trains in this adit are hauled by electric storage battery locomotives with automatic dumping cars.

GOLD ZONE MAKING SOME IMPROVEMENT

Gold Zone was active during the week in point of development. Another shipment of ore is being prepared which will be delivered to the Tonopah mill. Operations are being prosecuted on both the 700 and 800 levels and a very satisfactory showing is reported as being in evidence. This is one of the best properties that has steadfastly carried forward active development practically without interruption since the early days of the Divide excitement and the property has been developed to that stage whereby it will no doubt proceed to give a good account of itself in the future.

TURKISH REFUGEES URGED TO GO HOME

CONSTANTINOPLE, Aug. 7.—(By Mail to Associated Press)—The deplorable situation in Turkey and the gaps in the population brought about by the war, are causing serious alarm. In some villages, it is said, there have been virtually no children for several years. As a remedy it has been proposed to bring back to the home land who now are in Russia and the Balkans, the thousands of refugees born in the transfer of a few hundred thousand Moslems into Anatolia from Russia. It is argued would be extremely useful in Turkey, and Russia would never miss them.

FLOWER SPECIALISTS TO HOLD MEETINGS

KANSAS CITY, Mo., Aug. 7.—(By Mail to Associated Press)—The annual meeting of the Society of American Florists and Ornamental Horticulturists in this city Aug. 14-17. As the attractions to the major meetings there will be thousands of 25 societies interested in the culture of special flowers, such as the American Sweet Pea society and the American Rose society.

UNITED STATES SENATOR

Subject to the will of the Republican voters at the Pri-
mary Election to be held on Tuesday, September 5, 1922.

O. H. SMITH

Announces his candidacy for the office of

CONSTABLE, TONOPAH TOWNSHIP

Subject to the will of the Republican voters at the pri-
mary election to be held on September 5th, 1922.

TELL your dealer you want
to see a Fisk Tire beside any
other he offers you. He has it
in stock or can get it. See for
yourself what the Fisk Tire has
to offer in extra size and strength,
how its resiliency compares when
you flex the tire under your hand,
how the depth of the non-skid
tread looks beside other treads.
This is the way to buy tires!

There's a Fisk Tire of extra value in every size,
for car, truck or speed wagon

This illustration of the
New Queen Broom Holder
will give you an idea of how
handy and simple it really
is—No home is complete
without this practical, con-
venient device. We have
one for your home and
want you to call and re-
ceive this useful household
necessity with our compli-
ments.

Sincerely,

Tonopah Hardware Co.

Kindly bring this card.
